

THE POWER OF GREEN

QuickChange

Pneumatic blade change tool

QuickChange

Replacing blades with the help of air

- Fastest blade changes on KRONE ActiveMow and EasyCut disc mowers and the SP BiG M mower conditioner
- Easy, fatigue-free and convenient blade changes
- Ideal for applications that require frequent blade changes

It's easy:

Place the QuickChange claw spacer in the space between the disc with blade retaining pin and the blade carrier.

Operate the lever, applying air to the claws and pressing down the blade carrier. The blade retaining pin is now

exposed and you can remove, replace or reverse the blade. It's safe, simple and fast.

A KRONE exclusive!

This Quick Change tool offers a number of obvious advantages: Changing blades is much faster than by any traditional approach that uses screw-on or quick-fit blades. In addition, the tool is low-effort and very easy to use. The easy-use QuickChange tool reduces set-up times and makes the chore less fatiguing because it is carried out ergonomically.

On-site use

Provided the tractor is equipped with an air compressor, QuickChange is easily used in the field.

Position the new or reversed blade under the retaining pin and operate the lever again. This removes the air and releases the claws, which in turn

releases the knife carrier so this jacks up, locking home the blade retaining pin.

The new blade is now secured in position.

KRONE Internet

Discover the world at KRONE and browse through our website pages to find facts and figures and also new developments plus a wide range of services. Explore our website and find out how versatile the KRONE world is.

News

Click here to find up-to-the minute information about KRONE – from new product presentations to show reviews. Here you are at the pulse of KRONE life.

Products

Find extensive information on our full product range. This section holds everything you need – from video clips to manuals.
